Subject:

Comments on DFI + 2

para 13 d - as advised previously via ADA there will be insufficient programme provision to provide a shielded remote work area. SM has suggested that copy machines could be located in first floor punch room initially as a solution to this.

✓ f. - delete the word "possible"

para 14 & 15 - is the 3400 "obsolek" or "obsolescent"?

✓ para 18 - the installation of additional diesel capacity will necessarily involve an EPA approval.

~~APPENDIX 4 ESTIMATED PROJECT COST SUMMARY~~

~~XXXX~~

1	Date of Cost Estimate	June 1983
2	Source of Cost Estimate	DSD
