(copy)

Attention : AF
Information : ADO, ADA
Subject : Maintenance of DSD network equipment

Network equipment for project Hendry has been delivered with a tentative installation date for the 26th of July. Please make appropriate arrangements for the inclusion of this equipment into the existing maintenance contract with Cray Australia.

Another maintenance issue needs to be addressed in relation to spares. Faulty network equipment cannot be returned to suppliers for repairs. DSD must therefore purchase all equipment that is replaced. Please investigate the possibility of modifying the maintenance contract to cover this situation. It is understood that a similar arrangement has been made for maintenance of VAX equipment in the PTT labs.

Call me or on PAX 102 if you have any questions.
